# expandit

Launch Utility

– NAV/Navision scheduling in three easy steps

ExpandIT Launch Utility makes it easy to enable scheduled and automated jobs in NAV/Navision.

Product features in brief:

- Thousands of active customers worldwide.
- Automates and schedules NAV jobs in Windows Job Scheduler.
- Receive a status reports via email and/or SMS.
- Automate other Windows programs to run before and after NAV-jobs.
- Integrates NAV in a Windows environment.
- Log NAV events the same place as Windows events.
- Works with all NAV versions worldwide.
- You do not need to run a NAS.
- A server restart alone will set your NAV straight.
- Jobs can run with their individual security context.
- Jobs can be securely accessed on standard Windows servers from remote.
- Run older jobs on newer NAV for as long as NAV supports the components you use in the jobs.

Setting up is easy:

1. Give ExpandIT Launch Utility the appropriate login credentials and tell it which task to run.
2. Tell ExpandIT Launch Utility how you want it to behave when it is done or if the job fails.
3. Save as many different job configurations as you like; create the scheduled tasks and complete the automation in the Windows Control Panel fitting the job into your other scheduled tasks.

What do you get?

You download the software from www.expandit.com; buy the license file from your existing NAV-Partner and get support from ExpandIT working with your existing NAV-Partner.

Simply send your issue, challenge or idea to support@expandit.com and we will work with you and your existing NAV-Partner to get better mileage out of your NAV.

"My dream of automated processing came true when we implemented ExpandIT Launch Utility"
- CEO, Topspares A/S

ExpandIT Launch Utility can be downloaded from www.expandit.com and comes with a demonstration license, that accepts companies with names starting with CRONUS.
