- The NAV/Navision team,
Actona Company A/S

Use case scenarios:

Invoices

Invoices are sent directly to your customer with a digitally signed PDF-copy attached.

Purchase orders

Purchase order information is sent directly to your vendor's sales department with a PDF-copy of the order attached.

Newsletters

1000 personalized emails with NAV/Navision information, pictures and hyperlinks are sent by the SMTP server from NAV/Navision to contacts managed by NAV/Navision. The email is designed in the marketing assistant's favorite HTML-editor and sending the emails takes less than 3 minutes.

Order Confirmation

An email order confirmation is prompted by a sales order and mailed to your customer. Shipment information and payment terms from the administrative system are included in the mail.

Work sheets

Signed work sheets are sent directly to your customer with a PDF-copy attached.

Sales statistics

Each salesperson receives sales statistics on a daily basis or on request. Used in combination with ExpandIT Launch Utility these recurring mails can be automated and scheduled using Windows Scheduled Tasks.
